Product	P/N	UPC
MMX3 Quick-Flip, QD Picatinny	8016000100	810013524109
MMX4 Quick-Flip, QD Picatinny	8016000200	810013524123

The Mepro MMX3 and Mepro MMX4 micro magnifiers are compact, lightweight magnifiers that will extend your effective range of your red dot or 1x reflex sight. Weighing in at 6.1 or 6.9 oz respectively they reduce the footprint, saving rail space and weight on your firearm.

Elevation and windage dials provide precise FOV line of sight alignment. A wide FOV enables rapid target acquisition with both eyes open which is ideal where agility, and speed are of the utmost importance.

The Mepro MMX3 and Mepro MMX4 micro magnifiers attach to any MIL-STD-1913 rail directly behind your optic. When not in use the Mepro MMX3 and Mepro MMX4 can be "flipped" out of the way by depressing a pushbutton.
